Button Y	<input type="text" value="300"/>
Button Type	<input type="checkbox"/> Link
Button Text	<input type="text" value="Link demo"/>
Button Link	<input type="text" value="http://www.magicpoint.org/extensions/mix"/>

SLIDE SETTINGS:

- **Enable Slide** - Choose if you want to enable or disable a specific image;
- **Slide Duration** - The slide duration is an optional attribute. By default, the slide uses the default duration as specified in the Default Slide Duration, but you can define a different value;
- **Slide Transition** - Possible values are - slide, fade, bright, dark;
- **Image Path** - The image path is used to specify the location of the image that should be loaded in the slide.

TITLE SETTINGS:

- **Title X** - The distance from the left;
- **Title Y** - The distance from the top;
- **Title Width** - The width of the title. If you have a too long title and the specified width is too small then your title will be wrapped into multiple lines;
- **Title Color** - The color of the title;
- **Title Text** - The title of the image.

TEXT SETTINGS:

- **Description X** - The distance from the left;
- **Description Y** - The distance from the top;
- **Description Width** - The width of the description. If you have too long description and the specified width is too small then your description will be wrapped into multiple lines;
- **Description Color** - The color of the description;
- **Description Text** - The description of the image.

BUTTON SETTINGS:

- **Button X** - The distance from the left;
- **Button Y** - The distance from the top;
- **Button Type** - There are 4 types of button - link, youtube, vimeo, video;
- **Button Text** - The text of the button.
- **Button Link:**
 - If the buttons type is **LINK** then you have to define an **HTTP address** to which you want the user to be redirected;
 - If the buttons type is **VIDEO** then you have to define a **path to the video** you want to play;
 - If the buttons type is **YOUTUBE** then you have to define an **ID of Youtube video**, such as **0XXd8bpqCfw** (<http://www.youtube.com/watch?v=0XXd8bpqCfw>). You can get the ID from the browsers address bar on the videos page.
 - If the buttons type is **VIMEO** then you have to define an **ID of Vimeo video**, such as **3114617** (same idea as to YouTube). You can get the ID from the browsers address bar on the videos page.
