Row Text Color	<input type="text" value="0x000000"/> <input type="checkbox"/>
Row Text Shadow	No ▾
Image Path	<input type="text"/>
Image Width	<input type="text"/>
Image Height	<input type="text"/>

- **Module Class Suffix** - A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling;
- **SWFObject script** - Mode 1 will use a local copy. Mode 2 will use the file hosted by Google. Safe mode will switch to a safe embedding code;
- **Debug Mode** - No (Recommended).

#### GLOBAL SETTINGS:

- **Global stage width** - Set up the global stage width, the actual width of the flash animation;
- **Global stage height** - Set up the global stage height, the actual height of the flash animation;
- **Hover Effect Percent** - Here you can set hover effect percent for all columns;
- **First Column Hover Effect** - Enable or disable hover effect for first column.

#### COLUMN SETTINGS:

- **Enable Column** - Choose if you want to enable or disable column;
- **Column Width** - Set width for column;
- **URL Link** - Insert a URL link for column;
- **URL Target** - Target for URL link (blank or self);

#### ROW SETTINGS:

- **Enable Row** - Choose if you want to enable or disable this row;
- **Row Height** - Set the row height;
- **Row Color** - Set the row color. For more row effect, you can use instead of colorpicker these color: **red**, **black**, **orange**, **ocean**, **green**, **blue**, **brick**, **purple**;
- **Row Text** - If you do not want text to appear, leave empty this field;
- **Row Text Size** - Set the row text size;
- **Row Text Color** - Set the row text color;
- **Row Text Shadow** - Enable or disable text shadow effect;
- **Image Path** - Path to the image you want to display on this row. If you do not want image to appear, leave empty this field. For the image to be displayed correctly you need to set **Image Width & Image Height**;
- **Image Width** - Set the image width;
- **Image Height** - Set the image height.
