SUPER BANNER SLIDESHOW

Super Banner Slideshow is the ultimate Flash tool that helps you to display photo album and slideshows on your own website. With dozens of preset themes, you can easily make XML driven photo galleries for websites. Super Banner Slideshow is extremely user-friendly. Its friendly user interface enables you to create amazing flash slideshows out of your digital photos with quick and simple steps. No Flash knowledge or programming skills are required. Everybody can make a dynamic flash slideshow album in less than 5 minutes.

Features:

There are more features, around 50 settings parameters available in the administration panel:
Simple way to show images on your homepage with animated text.

Two lines for each slide, set different Left Margin, Width and Color.

Five types of animations are available (Fade, Move from Left, Right, Top and Bottom).

Option to choose five different image transitions with auto transition

Click over the image will launch URL.

Options for HORIZONTAL & VERTICAL thumbnails arrangement.

Easy to position the Text & Thumbnails using align and spacing options.

TRANSITION EFFECTS: Using auto transition option the images can be automatically animated by five different transitions (Simple Fade-in, Move, Diagonal fade, Radial fade, Circular Mask, Random).

Option to choose any one of the transition for whole banner.

Display short and long text with smooth animation.

This module contains 7 (seven) predefined slides (to add more slides please contact support)

Global settings:

▼ Module Parameters	
Super Banner Slideshow (version 1.1.1)	
Module Class Suffix	<input type="text"/>
SWFObject script	<input type="radio"/> Mode 1 (local) <input checked="" type="radio"/> Mode 2 (Google) <input type="radio"/> Mode 3 (disable) <input type="radio"/> Safe
Global settings	
Global Stage Width	<input type="text" value="590"/>
Global Stage Height	<input type="text" value="300"/>
Stage background color	<input type="text" value="000000"/> <input type="checkbox"/>
Stage background transparency	<input type="text" value="50"/>
Image settings	
Image Width	<input type="text" value="590"/>
Image Height	<input type="text" value="300"/>
Image Transition Type	<input type="text" value="Circular Mask"/> ▼
Images Resize	<input checked="" type="radio"/> None <input type="radio"/> Fit <input type="radio"/> Fit to area
Image Align	<input type="text" value="Top left"/> ▼
Random Image	<input type="radio"/> Yes <input checked="" type="radio"/> No
Auto Slideshow	<input checked="" type="radio"/> Yes <input type="radio"/> No

Module Class Suffix - A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling

SWFObject script - Mode 1 will use a local copy. Mode 2 will use the file hosted by Google. Mode 3 will disable insertion but it will use the code. Mode 4 will switch to a safe embedding code.

Global stage width - Set up the global stage width, the actual width of the flash animation

Global stage height - Set up the global stage height, the actual height of the flash animation
